The Gallitano Laboratory is seeking 2 bright, dedicated undergraduate students to assist in performing research on the genetic pathways underlying schizophrenia. This volunteer position is an excellent opportunity to gain direct experience working in an exciting neuroscience laboratory using the newest molecular and behavioral techniques.

Typical hours: 5-10 per week
Where: University of Arizona College of Medicine-Phoenix campus (5th and Van Buren) walking distance from light rail and buses.

To be eligible, students must:
Be able to make at least a ONE YEAR commitment to the lab
Have a strong GPA (3.2 and above) in neuroscience related major

Read about Dr. Gallitano’s research at: http://phoenixmed.arizona.edu/directory/gallitano-mendel-amelia

Interested students should email Amanda Maple, PhD. amaple@email.arizona.edu with a one-page statement regarding their interest in research, along with their CV or resume.
