

A Certificate in the
History & Philosophy of Science
 A School of Life Sciences Certificate Program

The School of Life Sciences offers an Undergraduate Certificate in the History and Philosophy of Science. This certificate program is designed to give students an understanding of both traditional philosophic issues surrounding science and the historical development of concrete scientific theories and ideas. The philosophic questions (of the belief-worthiness and interpretation of scientific claims as well as norms within or about science) both enrich and are enriched by their combination with historical study. Such philosophic and historical study will also often include the examination of contemporary sciences and their place within the larger society.
